Git Large File Storage

Git Large File Storage (Git LFS) manages large files in Git.

Installation

```
brew install git-lfs # macOS
sudo apt-get install git-lfs # Ubuntu/Debian
git lfs install
```

Usage

```
git lfs track "*.psd"
git add .gitattributes
git add path/to/your/largefile.psd
git commit -m "Add large file with Git LFS"
git push origin main
git clone https://github.com/user/repo.git
git lfs pull
```

Configuration

Ensure remote repository supports Git LFS.

```
git lfs ls-files
```

Tips

```
git lfs migrate import --include="*.psd"
```
